SIMPLE OFF GRID SOLUTIONS

DESIGNED AND DEVELOPED BY  SkyEnergy

Experience living completely
off the grid—with the luxury
of being on the grid!

SkyBox is built Aussie tough

The SkyBox is designed for both indoor and outdoor use and provides enormous battery capacity in one cabinet.

Rigorously tested in the demanding Australian conditions, so you know it will handle everything you throw at it and more. Meaning you can enjoy all the luxury of being on the grid while being off-the-grid! When you want to expand, simply add more batteries to suit your storage requirements.

SkyBox Features

Solar Compatible

The SkyBox can be used in off-grid as well as other alternative energy systems. It is compatible with both solar charger controllers and new or existing grid-tie inverters.

No Break Supply

The SkyBox takes over the supply to the connected loads in a grid failure or when generator power is disconnected. This happens so fast (less than 20 milliseconds) that computers and other electronic equipment will continue to operate without disruption.

Off-Site Monitoring

When connected to the internet, SkyBox can be accessed remotely, and settings can be changed.

Maximum Power

Up to 6 SkyBoxes can operate in parallel to achieve higher power output. Six units, for example, will provide 25 kW / 30 kVA output power with 420 Amps charging capacity. In addition to parallel connection, three units of the same model can be configured for three-phase output. But that's not all: up to 6 sets of three units can be parallel connected for a 75 kW / 90 kVA inverter and more than 1200 Amps charging capacity!

SkyCare™ Monitoring

Our free remote monitoring app will display all your system data in a comprehensive graphical format. System settings can be changed remotely via the portal. Alarms can be received by e-mail.

Power your home.
Your shed.
Or both.

The ultimate flexibility for off-grid power solutions and backup.

Choose your power sources, and SkyBox will create a virtual power grid for your home during blackouts and in off-grid applications.

The Brains of the system, the SkyBox, acts as a conductor in the orchestra. It balances and manages power flow from your selected power source and provides a steady 240V of electricity to your home or business.

You can expand your SkyBox as your needs change and grow, delivering you outstanding flexibility and peace of mind.

Monitoring

No matter if you're on the move working hard, or relaxing on your couch. With our specifically designed monitoring app, you have the power to see what's going on anytime, anywhere, as long as you have 4G connection.

The powerful core of your SkyBox.

- ✓ Lithium Model
- ✓ Up to 23Kwh per SkyBox
- ✓ Up to 9000W Peak Output
- ✓ -10° to 50° Operating Temperature
- ✓ 10 Year Warranty

Plug and Play.

01. Customize

Get the maximum potential out of your SkyBox when we customise it for your lifestyle and usage.

02. Build

Our team of electricians and engineers carefully build a SkyBox to your specifications and test thoroughly.

Then it's a teary goodbye as the SkyBox leaves our Victorian headquarters as it begins its adventure to its new home.

03. Install

Your SkyBox arrives safely to your property, then simply ask your local sparky to come and plug it in. Start powering your life!

CASE STUDY

Meet Tom and Martha

Tom and Martha live in beautiful rural Victoria with their two dogs Ben and Jerry. Surrounded by stunning views, their newly built dream home contains a couple of big water tanks and a whopping sized shed that Tom could use as a workspace. All that was missing was a reliable power source.

NO GRID CONNECTION

Their nearest power line is a fair way down the road, and connecting their house would cost a small fortune, not to mention paying the ever-increasing electricity bills on top of that year after year. Their other choice was to go entirely off-grid with solar.

That's when they discovered SkyBox, the powerful plug and play off-grid battery system that connects to any solar system or a generator, to give full seamless off-grid energy. The SkyBox produces so much energy that Tom and Martha feel like they're living on the grid.

Tom and Martha had the SkyBox delivered to their property and simply asked their local sparky to come and install it. Within a few weeks from the initial call to SkyEnergy, they now have unlimited power.

The shed is connected and enables Tom to work late into the night until Martha drags him inside. **Now they're producing enough power to send back to their home and run the whole property off-grid!**

Keep your tiny home powered with the SkyBox.

Our engineers' outside-the-box thinking has enabled us to develop an off-grid solar solution that fits in one compact box. Offering robust and efficient performance, it's the perfect match for our tiny home customers.

Simply add on to the original SkyBox if more power and storage is required. The best part is if you wish to relocate your tiny home, the SkyBox is quick and easy to connect and disconnect. Your local sparky can help you with this, no worries.

SkyBox

Features

Protection	Complies with IP55 IK10, NEMA 4 (Independent accredited test laboratory)
Standard	IEC62208, IEC/EN/AS60529
Material	<ul style="list-style-type: none"> · Body: 1.5mm galvanised steel sheet · Gland Plate: 1.5mm galvanised steel sheet · Door: 1.5mm galvanised steel sheet · Device Mounting Plate: 1.5mm galvanised steel sheet · Seal: Polyurethane
Body	The robust monoblock body is fabricated using 1.2mm galvanised steel sheet. Flat face sealing surfaces are provided to increase seal life. Pre-fitted blind nutserts are incorporated to accommodate mounts and accessory fasteners to eliminate drilling and retain IP rating. Integral device plate mounts and M6 earth stud is provided.
Double Doors	The robust surface mounted door is fabricated using 1.5mm galvanised steel sheet and incorporates concealed removable hinges with captive pins. The door is designed for a 110° opening. Each door contains integral cable management rail studs, M6 earth stud.
Seal	A high quality machine-applied full perimeter UL listed Polyurethane seal foamed in place (FIP) provides excellent sealing over a long life. Temperature resistance -40°C to 80°C (160°C short term loading).
Lock	3 point locking system with key-lock swing handle.

FAQs

What is a SkyBox?

SkyBox is a solution to make getting electrical power 'off-grid' easy. In the past, you'd have to pay up to tens of thousands to run cables to your home or property; SkyBox solves that and doesn't require an off-grid qualified electrician to install. Since any electrician can install it, you can save thousands compared to installing an off-grid solar system through an off-grid installer or provider.

Who can install the SkyBox for me?

Any licensed electrician can install the SkyBox.

What power inputs will the SkyBox recognise?

The SkyBox can draw power from any wind turbine, water generator, solar or other power source. As long as that power source is installed via an AC Couple to the home, SkyBox will automatically detect the excess power and charge the batteries.

What is SkyCare?

SkyCare is a support team based in Victoria that you and your electrician can call with any technical questions about the SkyBox, this ensures you have an award winning team behind your off grid installation to ensure you have peace of mind with your off grid power setup!

I have a generator in the shed, can I hook it up to the SkyBox?

Yes, though the SkyBox has specific requirements around voltage and receiving 'clean' power from a generator, as long as your generator puts out 50Hz and close to 240V, then it can easily be plugged into the SkyBox. SkyBox is pre-programmed for this feature, to make it easy.

Can it charge my electric car/tractor?

Yes, the batteries can be connected to a charges to charge vehicles and appliances

If I want to move my shed in 12 months is it easy to shift the SkyBox?

The SkyBox is easy to install and easy to uninstall by a licensed electrician, this means you can shift the SkyBox as you require.

Do any rebates apply to the SkyBox?

Depending on the region and state your SkyBox may be eligible for government subsidy.

Can I install the SkyBox outside?

Yes, when the door is closed and the cables are installed according to the instructions, the SkyBox carries an IP55 Rating, meaning it is weather resistant.

Can SkyBox deliver 3 Phase power?

SkyBox can give your home three phase capabilities, for those who need some extra juice, this is entirely possible and easy to do. We program everything for you before it leaves our warehouse, giving you easily installed, three phase off grid or backup power.

What's the depth of discharge of the batteries?

The Lithium batteries in the SkyBox have a 95% depth of discharge. This means you can use 95% of the stored power within the batteries. This is compared to the 60% usable capacity you usually get when using products like lead acid batteries off the grid. This gives you a lot more endurance and power capacity.

Can I expand the SkyBox down the track?

Yes, you can expand the Sky Box's capabilities almost to infinity and beyond.
